Para Jumbles

Introduction to Para Jumbles

Approaches to Para Jumbles

How to solve Para Jumbles

Solving a para jumble involves arranging a set of sentences or phrases into a coherent paragraph. Here's a step-by-step guide to help you tackle para jumbles effectively:

- **Read All Sentences:** Start by reading all the sentences carefully to get a general idea of the content and context.
- **Identify Keywords:** Look for keywords or phrases that indicate relationships between sentences. This can include pronouns, conjunctions, or transitional words (e.g., however, therefore, additionally).
- **Find the Opening Sentence:** Determine which sentence introduces the main idea. This is often a sentence that sets the context or presents a topic.
- **Look for Logical Connections:** Analyse the sentences for logical progression. Check if one sentence provides a cause, explanation, or example for another.
- **Consider the Flow:** Pay attention to the flow of ideas. The sentences should connect naturally.
- **Group Related Sentences:** Identify any sentences that belong together based on their content or themes.
- **Trial and Error:** Once you have an initial arrangement, read through the sentences in that order. Adjust as needed if something feels out of place.
- **Practice:** The more you practice with para jumbles, the better you will become at recognizing patterns and making connections quickly.

Practice Questions

Directions Qs (1-5): Opening and Closing statements are fixed. Arrange the statements (in between) in a logical sequence to form a coherent paragraph:

Ques-1:

A) Sunshine beat upon the cobbles, and a lazy summer wind raised yellow dust which trailed in clouds down the avenue. (Fixed)

B) The child stood dreamily gazing.

C) Occasionally he trod upon the end of it and stumbled.

D) A short rope was dragging from his neck.

E) After a time, a little dark-brown dog came trotting with an intent air down the sidewalk.

F) The child stood dreamily gazing. (Fixed)

Options:

1)BDCE 2)CDBE 3)DBEC 4)EDCB

Ques-2:

A) Among the Native peoples of the Plains, the Southwest, and parts of present-day California, Coyote was the central figure of the age before humans were created.

B) He often engaged in mischievous activities that brought both trouble and transformation.

C) In various stories, Coyote was responsible for shaping the world and bringing fire to people.

D) His actions, though unpredictable, were seen as essential for the survival and development of early humans.

E) Hundreds of tales told by these peoples describe his exploits as a trickster and as a benefactor to humankind.

Options:

1)BCD 2)CBD 3)DBC 4)BDC

Ques-3:

A) Today, it's hard to fully inhabit the excitement felt by the pioneers of analytic philosophy and their immediate descendants, but it's impossible to doubt that there was considerable excitement at the time.

B) The early analytic philosophers were driven by a passion for clarity, precision, and logical rigor.

C) They sought to resolve philosophical problems through the analysis of language and logical form.

D) Figures like Bertrand Russell and Ludwig Wittgenstein made groundbreaking contributions that reshaped the landscape of philosophy.

E) Their work laid the foundation for much of contemporary philosophy and influenced various other disciplines.

Options:

1)CDB 2)DCB 3)BDC 4)BCD

Ques-4:

A) "Here they come, Mother," cried Tom when a big truck drove up in the teeming rain and stopped in front of the empty cottage across the street. (Fixed)

B) Another big boy, carrying a well-bundled baby, followed.

C) Mother hurried in from the kitchen and we three looked out.

D) Mr. Duvitch and the biggest boy carefully helped Mrs. Duvitch from the seat and walked her into the house, supporting her all the way.

E) That truck, we knew, contained the Duvitch family and all their earthly possessions.

F) A stream of young Duvitches, accompanied by a big brown houndlike dog, poured out of the back of the truck and stood in a huddle in the rain. (Fixed)

Options:

1)DEBC 2)CBDE 3)ECBD 4)BDCE

Ques-5:

A) He sat down by the window on a rickety chair that protested under his weight, and quite mechanically he put his pipe in his mouth and dipped into the side pocket of his coat.

B) His rough clothes were old and slouchy.

C) And his cotton shirt, a cheap, two-shilling affair, showed a frayed collar and ineradicable paint stains.

D) His movements were slow, almost hulking, as though he were burdened by the heavy weight of his muscles.

E) The absence of any tobacco made him aware of his action, and, with a scowl for his forgetfulness, he put the pipe away.

F) He was a solid-bodied, stolid-looking man, and his appearance did not suffer from being over prepossessing.

G) The uppers of his shoes were too weak to carry the heavy resoling that was itself of no recent date.

Options:

1)FBCDE 2)DCBEF 3)CFEDB 4)BDCEF

Directions Qs (6-14): Pick the odd one out statement from the jumbled statements given in each question.

Ques-6

A) Psychology can provide the capacity to critique power, and express suffering and frustration in the face of oppressive economic forces the individual must survive.

B) The language of psychology is instrumental in understanding individual behavior and societal dynamics.

C) In the modern world, we use the language of psychology to manage and assess concepts of agency, mastery, and power.

D) Understanding psychological principles can help individuals navigate personal and professional relationships effectively.

E) It allows for a deeper comprehension of how individuals cope with and resist oppressive conditions.

Odd one out: A) B) C) D) E)

Ques-7

A) Haydn's contributions to classical music are considered fundamental in the development of sonata form.

B) One is a much greater variety of texture – the surface events and gestures of the music.

C) Purcell's compositions were grounded in the Baroque style, characterized by elaborate musical ornamentation.

D) This period saw the rise of instrumental music, with symphonies and string quartets becoming prominent.

E) Three crucial innovations of musical composition are part of the story.

Odd one out: A) B) C) D) E)

Ques-8

A) According to the Institute for Energy Economics and Financial Analysis, demand for natural gas in the region is actually projected to decline from 2019 to 2030.

B) But the numbers don't add up.

C) The pipeline project aims to meet an increased demand for natural gas.

D) Supporters of the project claim that the pipeline will provide job opportunities to people who live in the affected areas.

E) Renewable energy sources are becoming more popular and accessible in the region.

Odd one out: A) B) C) D) E)

Ques-9

- A) Born in 1879 in the village of Jacobschaven, Rasmussen got a head start on other Arctic explorers of his generation.
- B) At eight, he was driving his own dog team; at 10, joining the native men in hunts.
- C) The local schoolmaster complained that the parson's son was truant too often.
- D) Knud was developing a powerful physique and acquiring an intimate knowledge of the Eskimo's language, customs, and legends.
- E) He later became a renowned chef, known for his innovative recipes using Arctic ingredients.

Odd one out: A) B) C) D) E)

Ques-10

- A) These early drafts, often, are rough approximations of the final work, which only begins to take shape through the painstaking process of revision.
- B) Good writing is essentially rewriting, with the author refining their thoughts and improving their expression through successive drafts.
- C) Even seasoned writers often produce multiple drafts before they are satisfied with the final result.
- D) Many people believe that creativity is a natural talent that doesn't require much effort or practice.
- E) Perfectionism, as distinct from mastery, springs from an inadequate understanding of art

Odd one out: A) B) C) D) E)

Ques-11

- A) Long before the birth of computers in the 1930s and 40s, writers imagined intelligent machines.
- B) Greek mythology gave us our first humanoid robot: Talos, a giant robot made from bronze who protected the island of Crete from invaders.
- C) The first novel to explore AI was Samuel Butler's *Erewhon* in 1872, which tells of a utopia where machines are banned out of fear of them superseding humanity.
- D) In 1927, *Metropolis* became the first film to feature a robot as an evil replica of a human character.
- E) AI technology was initially developed to create new musical genres and help humans compose songs.

Odd one out: A) B) C) D) E)

Ques-12

- A) Happiness is as ambiguous and difficult to define as it is sought after.
- B) We can probably say without undue controversy that happiness must at least include a felt response to perceived good things in one's life.
- C) Happiness is always about life and is never defined merely in terms of momentary fragments of joy taken in isolation.
- D) The study of happiness has led to the development of several popular cooking shows focused on healthy recipes.
- E) Happiness is defined in terms of the many good aspects of life, which are themselves complex and composed of many parts.

Odd one out: A) B) C) D) E)

Ques-13

- A) ABC systems are involved not only in the import or export of a wide variety of substances but also in many cellular processes and in their regulation.
- B) Importers constitute mainly the prokaryotic transporters dependent upon a substrate-binding protein (BPD).
- C) Their function is to provide bacteria with essential nutrients even if the latter are present in submicromolar concentrations in the environment.
- D) ABC systems are primarily used in the development of advanced robotics for industrial applications.
- E) This research highlights the significance of these transporters in bacterial nutrient acquisition.

Odd one out: A) B) C) D) E)

Ques-14

- A) Stoicism emphasizes virtue, reason, and self-control as pathways to inner peace and a fulfilling life.
- B) Its focus on distinguishing between what we can control and what we cannot resonates deeply in today's uncertain world.
- C) The revival of Stoicism in modern times is largely driven by its timeless principles that advocate for resilience and wisdom.
- D) Stoicism is a popular cooking show that teaches viewers how to make traditional Greek dishes.
- E) Its appeal lies in providing practical tools to manage stress, foster emotional resilience, and achieve clarity in ethical decision-making.

Odd one out: A) B) C) D) E)

Directions Qs (15-20): No statement is fixed. Arrange the statements in a logical sequence to form a coherent paragraph:

Ques-15:

- A) The embryo floats inside the amniotic sac of the uterus.
- B) Babies begin to communicate as soon as they are born.
- C) Initially, the embryo is too young to be called a fetus and experiences nothing.
- D) Contrary to popular belief, these communication behaviors are not hardwired.
- E) The latest research shows that these behaviors self-organize in utero.

Options:

1)ABCDE) 2)ACEBD 3)CABDE 4)CEABD

Ques-16:

- A) This peculiar situation leaves the women of Cranford to manage their social affairs without male presence.
- B) In Cranford, all the holders of houses above a certain rent are women.
- C) As a result, the gentlemen seem to vanish, leaving the ladies to socialize amongst themselves.
- D) The town of Cranford is uniquely dominated by women, creating a curious dynamic.
- E) When a married couple arrives, the husband often disappears, either by circumstance or choice.

Options:

1)DBACE 2)BDCAE 3)DCAEB 4)BAEDC

Ques-17

- A) This view was known as monogenism, which created confusion about the existence of native peoples in distant lands.
- B) During the great voyages of discovery from the 15th to the 19th centuries, Europeans encountered various native peoples.
- C) As a result, Europeans struggled to explain how these different-looking and behaving groups fit into their understanding of humanity's origins.
- D) Before the theories of Charles Darwin, there was no widely accepted explanation for the physical and cultural differences among these peoples.
- E) The assumption that all humans descended from Adam and Eve contributed to this confusion, as it left Europeans questioning how these groups came to exist far from the Garden of Eden.

Options:

1)BCEAD 2)BECAD 3)CBEAD 4)DAECB

Ques-18

- A) One such example is the assertion by some physicists that time itself does not exist as we perceive it.
- B) These claims often challenge our fundamental understanding of the world around us.
- C) Despite this, in our daily lives, we rely on the concept of time to structure our activities and make sense of our experiences.
- D) Philosophers and scientists have occasionally made sensational claims that defy everyday beliefs.
- E) Such provocative ideas force us to re-evaluate and question what we take for granted.

Options:

1)ABCDE 2)DABCE 3)CDAEB 4)BEDCA

Ques-19:

- A) The Enlightenment era celebrated attention as essential for reason, education, and moral development, highlighting its importance for societal progress.
- B) In the 18th century, during the Enlightenment, inattention emerged as a significant social threat, linked to a shift from religious to logical and scientific explanations of the world.
- C) While modern technology indeed presents new distractions, historical perspectives reveal that concerns about inattention are not new, echoing contemporary fears.
- D) This period marked the beginning of viewing inattention not as an isolated vice but as a root of other moral shortcomings, with figures like James Beattie expressing concerns about its impact on social order.
- E) Philosophers and moralists of the time viewed inattention as a serious issue, with writers like Richard Steele and Samuel Johnson offering advice to combat the 'hurry of mind' afflicting the busy and distracted.

Options:

1)BADCE 2)BADEC 3)CEADB 4)DBACE

Ques-20:

A) Managers understand that to harness the full potential of their workforce, they must encourage workers to apply their best efforts, skills, and innovative ideas to maximize productivity.

B) Effective management involves leveraging this extensive pool of trade-specific knowledge and experience.

C) However, achieving this level of initiative requires managers to offer more than what is typically provided.

D) Each generation's ingenuity has undoubtedly contributed to better practices, which are then passed down.

E) Despite this broad progression, there's a significant lack of uniformity in the methods used within each trade.

Options:

1)ADBEC 2)CDEAB 3)ABCED 4)BADEC

Common Mistakes to Avoid

- **Ignoring Context:** Make sure to understand the overall theme.
- **Not Identifying the Topic Sentence:** Failing to identify it can lead to incorrect sequencing.
- **Forgetting About Pronouns:** Misunderstanding these references can disrupt the logical flow.
- **Assuming Linear Order:** Look for thematic or logical connections instead.
- **Rushing Through Options:** Rushing through options can lead to overlooking the best arrangement.
- **Neglecting Sentence Length and Structure:** Sometimes, longer sentences can serve as elaborations of shorter ones.
- **Ignoring Transitional Elements:** Not paying attention to transitional phrases can cause disruption in the flow of arrangement.
- **Not Practicing Regularly:** Like any skill, practice is essential. Avoiding practice can lead to poor performance during assessments.
